INTRODUCTION

and GENERAL INDEX

Henderson Directories Ltd., publishers, present to subscribers and the general public, this, the 1965 edition of the Saskatoon City Directory.

Confidence in the growth of Saskatoon's industry, population and wealth, and in the advancement of its civic and social activities, will be maintained as sections of this Directory are consulted, for the Directory is a mirror truly reflecting Saskatoon to the world.

The enviable position occupied by Henderson Directories Ltd. in the estimation of the public throughout the country, has been established by rendering the best in Directory service. With an unrivaled organization, and having had the courteous and hearty co-operation of the business and professional men and residents, the publishers feel that the result of their labors will meet with the approval of every user, and that the Saskatoon Directory will fulfill its mission as a source of authentic information pertaining to the city.

FOUR MAJOR DEPARTMENTS

The four major departments are arranged in the following order:—

I. THE BUYERS' GUIDE constitutes the first major department printed on goldenrod paper, and contains the advertisements of leading manufacturing, business and professional interests of Saskatoon. The advertisements are indexed under headings descriptive of the business represented. This is reference advertising at its best, and merits a survey by all buyers eager to familiarize themselves with sources of supply. In a progressive community like Saskatoon, the necessity of having this kind of information immediately available, is obvious. General appreciation of this fact is evidenced by the many reference users of this City Directory service.

II. THE CLASSIFIED BUSINESS DIRECTORY is the second major department printed on canary paper. This department lists the names of all business and professional concerns in alphabetical order under appropriate headings. This feature constitutes an invaluable and indispensable catalog of the numerous interests of the community. The Directory is the common intermediary between buyer and seller. As such, it plays an important part in the daily activities of the commercial, industrial and professional world. More buyers and sellers meet through the Classified Business Directory than through any other medium.

III. THE ALPHABETICAL LIST OF NAMES of residents and business and professional concerns, is the third major department, printed on white paper. This is the only record in existence that aims to show the name, marital status, occupation and address of each adult resident of Saskatoon, and the name, official personnel, nature and address of each firm and corporation in the city.

IV. THE DIRECTORY OF HOUSEHOLDERS, INCLUDING STREET AND AVENUE GUIDE is the fourth major department, printed on green paper. In this section the numbered streets are arranged in numerical order, followed by the named streets in alphabetical order, the numbers of the residences and business concerns are arranged in numerical order under the name of each street, and the names of the householders and concerns are placed opposite the numbers. The names of the intersecting streets appear at their respective crossing points on each street. Special features of this section are the designation of owner occupied homes and the designation of homes and places of business having telephones.

MUNICIPAL PUBLICITY

The Directory reflects the achievements and ambitions of the city, depicting in unbiased terms what it has to offer as a place of residence, as a business location, as a manufacturing site and as an educational center. To broadcast this information, the publishers have placed copies of this issue of the Directory in Directory Libraries, where they are readily available for free public reference, and serve as perpetual and reliable advertisements of Saskatoon.

Respectfully, The Publishers,
HENDERSON DIRECTORIES LIMITED

PUBLISHER'S NOTE

The information in this directory is gathered by an actual house to house canvass, and is compiled in a way to insure maximum accuracy.

The Publishers cannot and do not guarantee the correctness of all information furnished them nor the complete absence of errors and omissions, hence no responsibility for same can be or is assumed.

The Publishers earnestly request the bringing to their attention of any inaccuracy so that it may be corrected in the next Directory.

SASKATOON

(Story prepared by J. S. Woodward)

Not every community knows for certain how it came into being, who actually was responsible for its name, and who were the people who first settled there. Such, however, is not the case with the City of Saskatoon, the second largest city in Saskatchewan. Population 115,000.

The name of the city comes from that of a succulent berry found growing near the site selected for the founding colony by its head, one John N. Lake. It is the anglicized version of the Indian name Mis-sask- quah-too-min, a carpet of flowers. The plant actually has a botanical name, but that is of no importance here. What is important is that the name Saskatoon has spread all over the world for one reason or another, and Saskatoon berries have even graced the table of Her Majesty Queen Elizabeth II.

The City of Saskatoon owes its existence to the decision of a group of citizens of the Province of Ontario to establish a community far removed from what they felt were the temptations and excesses of their home province and start life anew as a Temperance Colony.

All this came about during the years 1881-1883. The actual date of the location of the headquarters of the colony has been established as August 20, 1882. A year later on August 18, 1883, the first actual settlers, some 35 in all, duly raised a pole and formally celebrated the founding of Saskatoon.

Space will not permit to tell here of the vicissitudes which confronted those early and hardy pioneers; they have been recounted in detail elsewhere. A few of the highlights must, however, be recorded to enable the reader and the visitor to Saskatoon to envisage the remarkable progress Saskatoon has made since the turn of the century.

As good a place to start is perhaps the arrival of the first train in the year 1890. One of the first effects, apart from the advantages to the small but growing community, was its value in the movement of livestock from the cattle ranches which had developed in the area. It is a far cry from the infrequent cattle shipments of those days to the $35,000,-000 income which the livestock and packing industry provided for the City of Saskatoon in the year 1964.

By the turn of the century a wave of immigration hit the Saskatoon territory in full force. It was to continue for more than a decade and an area which had witnessed little but buffalo hunting and the activities of various Indian bands saw trainloads of settlers effects and thousands of settlers pouring into central Saskatchewan with all the bearing this inevitably had on the growth and prosperity of the City of Saskatoon.

The first marked impact was made by the arrival of a colony of some 1,400 settlers from Britain brought out to the West under the leadership of one Isaac Barr whose name became synonymous with colony. Most of them eventually found their way to Lloydminster, so named after Rev. G. E. Lloyd, subsequently Bishop of Saskatoon whose aid in smoothing out the problems of the settlers was so suitably recognized.

On July 1, 1903, Saskatoon was granted the status of a town by the Territorial Government and a start was made on a variety of amenities suitable to the growing community. In 1906 the Town of Saskatoon, which was situated on the east side of the railway line, and the area to the west known as Riversdale as well as the original temperance colony site which had taken the name of Nutana, amalgamated to become the City of Saskatoon with the required population of 5,000. The census of 1911 gave the city a population of 12,004, a figure which incidently was considered far too low by the Board of Trade and businessmen of that year. Saskatoon was well on its way.

The year 1909, however, is another milestone in the march of progress of Saskatoon. In that year the Saskatchewan government, having in 1907 provided for the establishment of a provincial university, the Board of Governors of the institution decided to locate the University at Saskatoon on the east side of the river to the north of the original temperance colony survey.

The first classes were held in a downtown business block with 70 students of both sexes. It is doubtful if the first students or staff envisaged at that time the magnificent institution which now graces the original site with a student body and faculty of around 10,000. A faculty incidently whose reputation for scholarship and research is known in all parts of the continent and indeed of the world.

The Saskatoon Board of Trade came into being on January 9, 1903. It was incorporated under the Dominion Act in 1907 and has, since its inception, played an ever increasing part in the development and prosperity of the community. In its early days it made claim to three major achievements. It played a substantial part in having the main line of the Grand Trunk Pacific diverted from its original survey through Hanley, to come through Saskatoon. Now, of course, this is the main line of the Canadian National Railways which in the fall of 1964 opened a multimillion dollar new terminal on the western boundary of the city. In so doing it relinquishes 24 acres of the most valuable downtown property now in process of development to the extent of many more million dollars.

The second achievement which can be laid to the credit of the Board of Trade was the part it played in the establishment of the University here. Perhaps one of the most immediate early results of Board of Trade activities was the decision in 1910 to charter a special train to bring Winnipeg businessmen to Saskatoon to examine for themselves the prospects for establishing wholesale distributing houses here. Over 100 Winnipeg business heads took in the trip and many of today's prosperous wholesale houses in Saskatoon date their operations here as a result of that trip. Later on the Board played its part in persuading the Canadian National Railways to build the Bessborough Hotel which has meant so much to the traveller and organizer of conventions who use its many facilities.

The commercial life of the City of Saskatoon may properly be said to have developed in stages. The first of these coincided with the establishment of the city as a wholesale centre and drew to a close with the outbreak of the First World War. The second stage took place during the decade after its conclusion and came to an abrupt end with the depression of the thirties. The final stage, to the moment, started in the late '40's and has not shown any signs of stopping ever since.

It may be appropriate at this point to examine in some detail the present City of Saskatoon, and to project its future development.

No one looking forward to the future of Saskatoon based on conditions as they existed at the end of the Second World War could have vizualized the strides which the city has made in the past 20 years.

The population has grown from 45,000 to approximately 115,000. In the period from 1951 to 1964, building permits issued at the City Hall exceed $300,000,000. In the last seven years some 7,700 houses have gone up. A number of office buildings have helped to change the skyline of the city. In the past two years 54 apartment blocks, hotels and motels to the value of over $6,500,000 have gone to swell the construction total.

The area of the City has increased from 10,642 acres in 1954 to 20,027.46 in 1965. The assessment roll has grown from $51,000,000 in 1955 to $151,719,371 in 1964. The mill rate for that year was 65.25.

According to the Dominion Bureau of Statistics, Saskatoon was the third fastest growing city in Canada in the year 1963. The pioneers who laid out the original townsite had vision. They provided for exceptionally wide streets, they forsaw parks, they did not spoil the banks of the river. As the city grew these plans were followed, parks were reserved in all parts of the city and today comprise 1,104.5 acres. The river bank has been beautified and there is now envisaged a green belt surrounding the city.

As a result not only has Saskatoon become a city beautiful, but one where recreation facilities abound, and more will come about as the city grows.

No city of its size on the continent will surpass Saskatoon as a wholesome community in which to live and make a home.

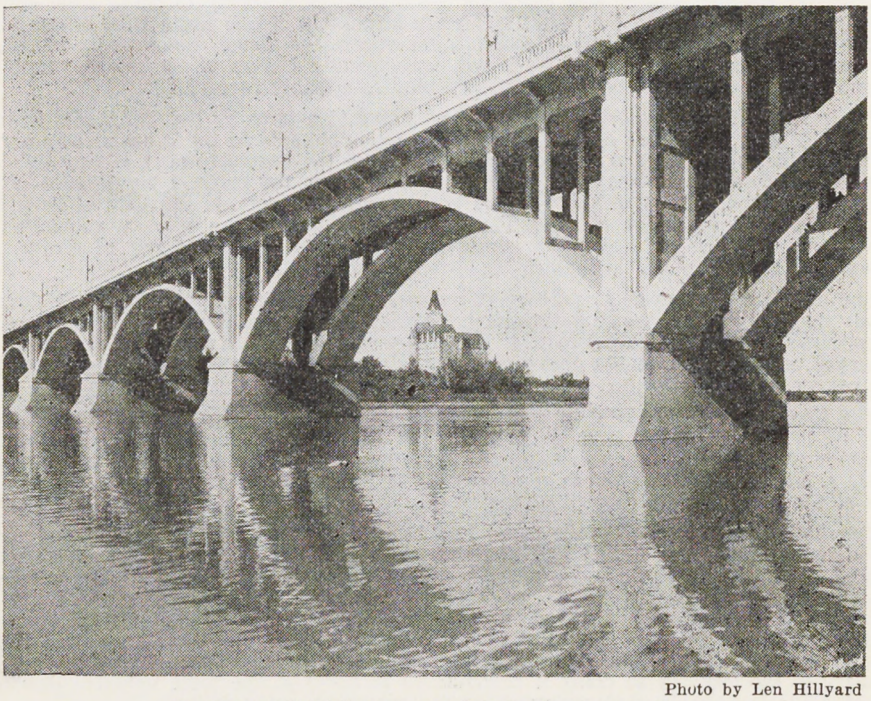

Photo by Len Hillyard

Bessborough Hotel through an arch in the Broadway Bridge.

Transportation Centre

A glance at a map will show the strategic position of Saskatoon as the transportation centre of the province, and, indeed it might almost be said, of Western Canada. The city is served by both the trans-continental railways, Canadian National and Canadian Pacific. Saskatoon is on one of the two main lines of Air Canada Airlines, which operate the Vanguard and Viscount services direct to Eastern and Western Canadian cities. Trans-Air operates a commuter service which connects the cities of Regina, Saskatoon and Prince Albert. A wide network of truck transportation and bus lines radiate from this city. The Saskatchewan Government operates a number of bus routes and the Greyhound Bus Lines serves this city on one of its transcontinental routes. Saskatoon is the headquarters of the Saskatchewan area of the Canadian National Railways and is also the headquarters of the largest division of the Canadian Pacific Railway in the west. Paved highways, together with the large number of branch railway lines leading out of the city, provide rapid service for wholesalers and manufacturers to their customers in the Saskatoon trading area. The opening of the new petrofke bridge brought a whole new area to the north-west in direct contact with Saskatoon. It should also be mentioned that the city operates up-to-date trolley and motor buses which extend service to all parts of the municipality.

The transportation industry is one of the largest employers of labor in Saskatoon.

Convention City

Business and social organizations increasingly make use of Saskatoon's convention facilities for holding their annual gatherings. In the past few years, this city has been host to conventions with up to 5,000 visitors and delegates. Hotel and motel accomodation as well as a fully serviced easily accessible municipal camping area will take care of upward of 1,500 visitors and in the cases of large conventions, there is no difficulty in finding accomodation in private homes. Saskatoon is particularly well suited as a convention city because of the Bessborough Hotel, with its ample room for main convention assemblies and additional rooms for administrative offices and smaller meetings. In the cases of very large conventions, arrangements can be made to hold the sessions in other buildings in the city with ample space. The Conventions Committee of the Board of Trade is always ready to help organizations in planning their arrangements in Saskatoon. Western organizations find Saskatoon particularly convenient as it is only an overnight run by train from Winnipeg and Edmonton, and by air, is within two hours of Winnipeg, four hours of Vancouver, and seven hours of Toronto and Montreal.

Industry

As has been said, Saskatoon early in its life as a city, quickly became the wholesale distributing centre for the vast territory extending for a radius of 200 miles east and west and 100 miles north and south. Now some 200 wholesale distributing firms service communities in this area of the province.

As is always the case, manufacturing began in a small way in Saskatoon following on the development of the city as a wholesale centre and now the product of some 300 plants total about $140,000,000 annually.

Retail establishments have kept pace with the expansion of business life of the city and now number around 1,200. Many of these would be a credit to a community several times the size of Saskatoon. Retailing in Saskatoon supports some 30,000 people.

Manufacturing plants have contributed largely to the growth of Saskatoon. Many of them began business in quite a small way and the extent to which they have developed may be gathered from the following list of products made in or adjacent to the city. They give an excellent picture of the diversification of industry in Saskatoon:

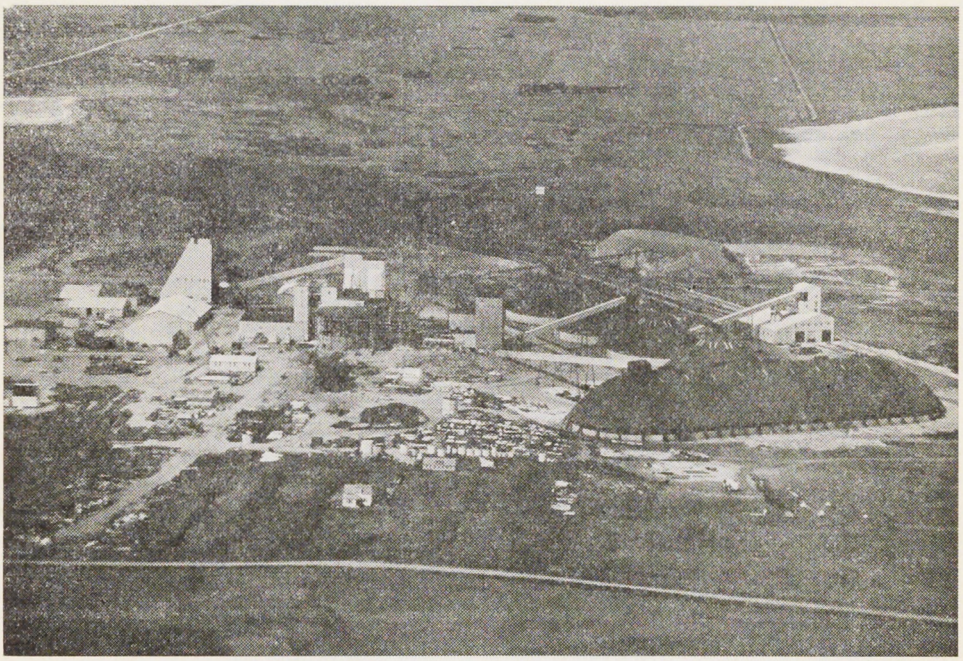
Farm machinery; road machinery; electric welders; stokers and burners; steam boilers; ammunition; tents and bedding; crests and pennants; artificial floral creations; playground equipment; brooms and brushes; building boards; cabinets; furniture and boats; outer clothing; truck and bus bodies; vegetable oils; TV picture tubes; automotive engines (rebuilt); fire engines; industrial chemicals; hockey sticks; potash mine and mill; flour and cereal mills; turkey and poultry processing; meat packing feed mill; oil refinery; iron works; foundaries; bakeries; breweries; printers; lithographers and engravers; concrete works; machine shops; sheet metal work; plastic products; paper boxes; cleaning compounds; corrugated cartons; agricultural chemicals; and insulating materials.

An industry which employs the largest number of personnel in the city is the meat packing and processing plant of Intercontinental Packers Limited, the only privately owned large scale operation of its kind in the west. At peak of operations this enterprise employs around 650 people. Its products, including the internationally famous Europa Ham, find markets in all parts of the continent and overseas. Its location in Saskatoon is largely due to the quantity and excellence of the livestock raised in this area as well as to the facilities offered for such an industry by the city.

Intercontinental over the years since establishing in Saskatoon has pursued a policy of expansion both in the city and by purchase of plants in Regina, Red Deer and Vancouver. The founder of the firm, Fred Mendel, has been a well-known benefactor of CIVIC undertaking; most noteworthy of this being the Mendel Art Gallery, one of the striking recent additions to the cultural life of Saskatoon.

During the first 75 years of its existence no one gave much thought to what lay below the surface of the district surrounding Saskatoon. True, one or two individuals had the idea that gas or oil could be found in the neighborhood and a number of holes were drilled, but to no effect. Then around 1954 a series of holes drilled down to some 3,500 feet discovered a bed of potash lying below a complex formation including the Blairmore sands, and a huge thickness of limestone and salt. This discovery sparked the most exciting rush to hit Saskatoon and district since the settlement boom of the first decade of the century.

The first practical manifestation of this was the development at Patience Lake some 15 miles east of the city of the mine and mill of the Potash Corporation of America, a Carlsbad, New Mexico, based company who had done the testing. With some difficulty they sank a shaft through the various formations and started to mine potash some six years ago. Then work was halted about a year later due to the influx of water from the moisture laden Blairmore formation. Since that time the difficulties have been overcome, the mine and mill rebuilt and the company started up production again this spring. In the meantime some 12 companies from Europe and the United States have obtained exploration permits and of these three are now in process of sinking shafts or making the necessary tests to enable them to do so. Each mining operation involves the expenditure of up to $40,000,000 and employs up to 400 or more personnel with all the effect this has on the economy of Saskatoon. Currently engaged in shaft sinking are the U.S. Borax Company from Carlsbad at Allan, 30 miles east of the city; at Lanigan some 60 miles to the east the Alwinsal Company with German and Belgian capital behind it are also shaft sinking; while just west of the city limits the Duval Corporation is operating a pilot plant with a view to establishing the possibility of solution mining of their deposits.



Potash Company of America Mine and Refinery Photo by Len Hillyard

Just recently the Consolidated Mining and Smelting Company, a well-known Canadian Corporation, has announced its intention to develop the leases they hold in the neighborhood of Delisle, some 25 miles southwest of the City. This company envisages an expenditure of up to $75,000,000 to bring their deposits into production. Subsequently the leases held by the Consolidated Morrison Company have been taken over by the Noranda Corporation and they too have announced that they will start development of their area in the neighborhood of Elstow and Colonsay, some forty miles east of Saskatoon.

Some 20 corporations have obtained rights to produce potash from Saskatchewan deposits and of these, including those just mentioned, 12 are located within a 75 mile radius of Saskatoon. When the Potash Corporation established here they said publicly that their deposits would last them for at least 100 years, so that a permanent future of the industry would seem to be assured for a century at least. So it is not surprising that Saskatoon is coming to be considered as the Potash Capital of North America if not of the world.

While Potash plays a major role in the exciting future for Saskatoon other recent developments should not be overlooked. Prominent among these are the establishment on the outskirts of the city of two major chemical plants and just lately a multimillion dollar plant of the Cement Company of Canada.

The chemical industry got underway with the location here of a giant complex built by Inter-provincial Co-operatives Ltd., which turns out pesticides, caustic soda, and chlorine. It was followed shortly after by a $4,000,000 plant erected by the Armour Chemical Company of Chicago which located here in order to avail itself of certain by-products of Interprovincial and other fatty substances. Interprovincial located in Saskatoon largely because the plant is sitting on a vast bed of salt needed for a large part of their operations.

Canada Cement started operations just outside the city with an extensive distribution plant and last year announced the intention to commence the manufacturing process which will ultimately involve an expenditure of around $12,000,000. All of these developments have contributed to the fact that at the moment there is to all intents and purposes no area of unemployment in the city, and this despite the fact that the population of Saskatoon is growing at a rate of some 5,000 a year.

With the substantial amount of serviced land available for small industry and large areas surrounding the city available for larger manufacturing plants, Saskatoon is confidently looking forward to extensive industrial growth in the next few years.

The next two years will witness the greatest change in the appearance of downtown Saskatoon in its history. This is coming about by the removal of Canadian National's facilities from the centre of the city and thus releasing 24 acres for major re-development. Structures in process of construction or in the final planning stage include a 12-storey office building to be known as CN Towers which will house the headquarters for the Saskatchewan Area of the railroad, as well as the present downtown facilities such as tickets, freight sales, telecommunications and so forth. Adjacent to the office building, which will be the tallest structure in the city, will be an enclosed shopping mall of 350,000 square feet of shopping space; the mammoth new store of Simpsons-Sears, a high-rise apartment building, and the city's Jubilee Auditorium. As a result of the removal of the CN's facilities and neighboring structures a new million dollar traffic bridge will lead to a freeway to the southern outskirts of the city, substantially relieving current traffic congestion on the present bridges at rush hours. Including the city's own share in the various expenditures involved in these developments the total outlay will not be far short of $20,000,000. This will ensure that permits for building construction in Saskatoon will be able to keep pace with the $35,600,000 worth issued in the year 1964.

The removal of the downtown facilities of the railway was accompanied by the removal of the former Nutana Yards to the new location of the railway's Saskatoon facilities in a whole new terminal on the western outskirts of the city. Here a 2¾ mile terminal complex was constructed on an area of 285 acres. It contains all the latest facilities for fast handling of freight express and passenger traffic, with 40 miles of track, a standing capacity for 2,000 freight cars and seven major buildings.

Meantime, the 200 acres so relinquished at Nutana are being turned into a modern industrial park subdivided into 70 lots of varying sizes to be available for light industry. It is confidently expected that this area will become one of the most attractive industrial locations in the west.

Centre of a Prosperous Farming District

The farming country tributary to Saskatoon is well suited to mixed farming, dairying and poultry production, so that agriculture, on which the prosperity of the city depends to so large a degree, has become well diversified and thus provides a much more stable income from farm operations than does a community which is wholly dependent on grain. The city provides a well established market for livestock and other farm products and a number of plants handle and process these, making it an attractive trading centre for the farm community which extends, so far as retail trade is concerned, approximately 100 miles in every direction. Recent improvements in farming brought about by experimental work at the University have all contributed to the increased advantages and wealth of the farming community of this part of Saskatchewan.

The University of Saskatchewan

The University of Saskatchewan, Saskatoon, overlooks the mighty South Saskatchewan River on a spacious 3,200 acre site, of which 300 acres have been set apart for the campus and the rest for the University Farm and Experimental Plots. It is almost as old as the province it serves. The province was carved out of the huge area of the Northwest Territories in 1905 and constitutionally launched in September of that year. Eighteen months later (April 3, 1907) the Legislature of the new province passed an Act establishing the University. A Convocation of the new University met in 1907 and selected a Chancellor and a Senate to govern it. The Senate and the Provincial Cabinet each chose half of an eight member Board of Governors in January, 1908, and by August the Board had selected Professor Walter Charles Murray, of Dalhousie University, to be President of the new institution. Within the next year, the Board established the academic policy of the University, selected a site for its operations, and let the tenders for its first buildings.

From modest beginnings in 1909 when five staff members and seventy students started classes in temporary quarters in downtown Saskatoon, the University has grown to the point where some 450 faculty and 8,000 day time students now occupy the campus, which has close to fifty buildings, most of them owned by the University, but several belonging to associated institutions.

Approximately one third of the buildings have gone up in the last fifteen years and an even more concentrated expansion program is at present underway. Six major building projects that were started on the Saskatoon campus since the fall, 1962, have been completed, two more are under construction, nine are being actively planned, and a number of others are contemplated. It is estimated that $24.8 million will be spent on construction at the Saskatoon campus in the next three years. The expansion is made necessary largely by a rapid increase in enrolment, which has more than tripled in the last ten years. By 1968, the University enrolment in Saskatoon is expected to be 8,800.

Recent major developments at the Saskatoon campus include the official opening of Canada's first Linear Electron Accelerator Laboratory and the establishment of Western Canada's first College of Veterinary Medicine.

The Linear Accelerator Laboratory provided the U of S with Canada's newest and largest university laboratory for nuclear research. Its establishment was an historic first for Canada and the University, since the accelerator, for a few years, will be the only atom smasher of its kind in this country and the best machine of its type in the world. It will be used to broaden and stimulate already existing research programs in nuclear physics, radiation chemistry, cancer therapy, and radiation biology, and it will open new avenues of research in other areas as well.

The accelerator is basically an 80-foot tube in which, through the action of radio waves, electrons are accelerated at speeds closely approaching that of light (186,000 miles per second). The electrons travel like experienced surf-board riders, coasting along with the energy generated by the waves until they bombard and cause the break-up of atomic nuclei, the study of which has made possible such developments as nuclear power, the atomic bomb and radioactive isotopes for medical use.

The new College of Veterinary Medicine with its teaching, research and service facilities will comprise a complete veterinary medical centre on the Saskatoon campus. Approval has been given to a two-year pre-veterinary course, and a four-year professional course leading to the degree of doctor of veterinary medicine will begin in the fall, 1965, when the first unit of construction on a college building is completed. The new college will eventually accomodate an undergraduate enrolment of about 240, with 60 students in each of the four years of the professional course. Accomodation will also be provided for extensive post-graduate training. As the research, service and post-graduate programs develop, a full-time faculty of about 50 is expected.

Another recent development of far reaching importance was the opening of a beef cattle research project. It provides facilities for research into problems of feed lot finishing of cattle on a scale never before possible in Canada and probably unsurpassed in the United States. It consists of an experimental feed lot and a feed mill, and it is closely associated with a central test station for the Record of Performance Program for beef cattle.

The teaching program on the Saskatoon Campus is provided through eleven colleges and three schools, and high standards of student performance have been insisted upon from the beginning. Saskatchewan, for example, was one of the first two universities in Canada to require a complete Grade XII standing for entrance, and for many years it has required of entering students an average of sixty percent in their Grade XII. Recently, a Grade XII average of 65 percent was introduced for those who enter the U of S directly from high school. The 60 percent requirement remains in effect for those who enter one year or more after high school. The quality of instruction is indicated by the achievements of many of the students in later endeavors. An example is the fact that no district electing Rhodes Scholars has sent students who as a group have done better at Oxford than those from Saskatchewan. Graduates of the U of S have reached positions of eminence in academic life and in the community at large. A Prime Minister, Members of Parliament and Provincial Legislatures, prominent clergymen, leaders of business and industry and outstanding scholars are numbered among its alumni.

The University offers courses leading to the bachelors degree in arts and science, agriculture, commerce, education, engineering, home economics, law, medical sciences, nursing, pharmacy, and physical education. The doctor of medicine degree has been given since 1957, and the doctor of veterinary medicine degree will soon be introduced. Masters degrees may be obtained in nearly all of the areas in which the bachelors degree is conferred. The doctor of philosophy degree is given in various subjects. The University also offers a wide variety of courses leading to certificates and diplomas, including post-graduate diplomas.

The University of Saskatchewan operates virtually the year round. The regular academic session, which extends from September until May, is followed by Intersession Classes, which in turn are followed by Summer School. A variety of classes are given in the evenings. In addition, the University is a popular location for conventions and meetings of various kinds.

Exacting scholarship in the humanities and high quality research in the pure and applied sciences have been the rule of the University of Saskatchewan since its early years. Publications in the fields of philosophy, political science, economics, history, literature, languages and mathematics have earned national and international reputations for faculty members, many of whom have been engaged frequently by governments for important economic or cultural studies.

Research in the pure and applied sciences is carried out on a broad front at the Saskatoon campus and some spectacular achievements have been recorded by U of S scientists over the years.

In 1948, Canada's first betatron (and the world's first betatron used for the treatment of deep-seated cancer) was installed and used for research in nuclear physics, radiation chemistry, cancer therapy and radiation biology. In 1951, the world's first non-commercial cobalt-60 therapy unit for the treatment of cancer was officially opened. It advanced research in radiological physics, radiation chemistry and the effects of high energy radiation on plants and animals. Work along this line will be extended with the installation of the Linear Electron Accelerator.

The Institute of Upper Atmospheric Physics at the U of S is recognized as one of the most important centres in the world for research on the aurora borealis (northern lights).

The Institute for Northern Studies encourages inter-disciplinary research of vast importance for the development of the North.

World-wide recognition has been received by the U of S for work carried out by the Department of Anatomy with arteriosclerosis (hardening of the arteries) particularly research into the use of nicotinic acid, or niacin, for lowering cholesterol levels. The Department of Physiology and Pharmacology has gained widespread recognition for research into blood coagulation, thrombosis, and the use of drugs developed for the treatment of thrombosis. Saskatchewan is a centre of research with the drug LSD, which has had great success in the treatment of alcoholism and various mental disorders.

The Department of Civic Engineering is doing research that could lead to improved methods of reinforcing long span steel joists, which are used in various kinds of construction. The Department of Mechanical Engineering is conducting a study of internal combustion engines that could make it easier to start automobiles in cold weather.

Arts and Lecture Theatre, University of Saskatoon

Research in Biomedical Engineering has resulted in such developments as a laser coagulator for the repairing of certain types of eye injuries by a procedure similar to spot welding; a simple aparatus for the direct transmission by telephone of electrocardiograms; radio telemetry equipment for monitoring the heart rate of athletes running all out on the track.

In the 1920's cement highly resistant to alkaline corrosion was produced at the U of S. Later, the first vaccines were developed to combat both human and equine encephalomyetitis (sleeping sickness). The breeding of rust-resistant varieties of wheat was pioneered at the U of S and is just one among many agricultural research projects.

The architectural style of the buildings is predominantly English Collegiate Gothic, ornamented with garrets and turrets, and clad in a local limestone popularly known as "greystone". A durable and distinctive construction material, the greystone has done much to make the Saskatoon campus one of the most attractive in Canada. Tasteful landscaping has added to its beauty.

The University of Saskatchewan colors are green and white. The motto is "Deo et Patriae" for God and Country. The University shield, inspired by Oxford's has the following heraldic description, "Vert, on a book open argent leathered sable between three garbs or, the words, 'Deo et Patriae' of the third." "Saskatchewan, Our University", a brisk march written in the late 1920's and popularly known as "The Fight Song" is the University song. The University Hymn, stately and melodious, was written in 1949. Men's inter-collegiate athletic teams are known as the Huskies and women's inter-collegiate athletic teams are known as the Huskiettes.

Other Educational Facilities

Apart from the University, Saskatoon is the centre of widespread educational training. At the primary level, there are 32 public schools in attractive modern buildings and 17 separate schools, nine large collegiates, five colleges affiliated with the University, a Teachers College, a Convent, a Provincial School for the Deaf, three Business Colleges and a new Co-op College. Vocational and apprenticeship schools also supply secondary training. Included in these is the new $2,000,000 Technical Institute erected jointly by the Federal and Provincial Governments. This institution may confidently be expected to provide in due course a pool of well trained personnel available for Saskatoon's industrial development. As in the case of the University, the secondary educational institutions and business colleges bring students into Saskatoon for the school terms. Quite frequently parents of children living in the rural districts come to live here for the purpose of making use of the city's facilities for the education of their children.

Cultural Activities

In the course of its industrial development, Saskatoon has not neglected the cultural and esthetic side of its community life. While a great deal of this can be attributed to the presence in the city of the University, the city itself has provided a main library and is about to build a new million dollar headquarters. There are already branches of the library in different parts of the city.

Art has been given a great lift by the magnificent art centre, largely financed through the generosity of Mr. Fred Mendel, to which reference has already been made. Years before a noteworthy collection of pictures had been established in the Nutana High School, and over the years a number of professionals and amateurs have contributed, to a noteworthy degree, to the artistic life of the community. Several of them have received recognition from institutes such as the National Gallery and even as far away as New York.

Over the years, amateur drama has flourished and a contribution has been made to this by the Greystone Theatre of the University of Saskatchewan.

Music has also been a noteworthy activity of Saskatoon's cultural life. For many years, the annual festival has been a means of developing outstanding musical talent, both vocal and instrumental, in Saskatoon and the neighbourhood communities. The Symphony Orchestra gaining increasing reputation as the years go by, has also played its part in the musical enjoyment of citizens of Saskatoon. Here again the contribution by the Music Department of the University is noteworthy.

The new Jubilee Auditorium will make it more feasible to attract audiences which now overflow the available space for concerts and musical productions and as a result it may be confidently expected that the cultural life of Saskatoon will continue to grow as the city itself expands.

Among the features in Saskatoon which attract a great deal of attention from visitors and tourists is the Western Development Museum. The history of the development of the province is shown by an extremely valuable collection of old time agricultural equipment, automobiles and displays of rural and urban amenities,, as they were in the days of the early settlement of the plains. Once a year these exhibits come to life in the annual Pion-Era show which takes place during the first week of July. Nothing quite like this show or this museum can be seen anywhere else on the continent.

South Saskatchewan River Dam

Three important developments foreshadow the increasing growth of the city of Saskatoon.

Two of these have been dealt with in some detail, namely the Potash Industry and the expansion of the University of Saskatchewan. The third of these is the construction of the dam and hydro power installation on the South Saskatchewan River some 60 miles south of the city.

This enormous project, which is now nearing completion, is giving employment to a maximum of 2,000 men, and ultimately will involve some 26,000,000 man-hours of on-site labor.

The dam itself will be the largest rolled-earth dam ever built in Canada and one of the largest dams of its kind in the world. It ranks second only to the St. Lawrence Seaway as the largest public works project ever undertaken in the Dominion of Canada. It will rise 210 feet above the river bed and its overall length will be 16,700 feet or around three miles, the main fill being 8,000 feet.

The dam will, when completed, fill a lake 140 miles long, with a shoreline of 475 miles. The overall project is under the immediate direction of the Prairie Farm Rehabilitation Administration, a unit of the Federal Department of Agriculture.

The construction of the dam now is bringing substantial business to Saskatoon as the city closest to the project, which has excellent highway and railway connections to the site. Provision is made at the site for visitors to watch the progress of the operation.

The dam is being constructed for five main reasons:

1. It will stabilize agriculture in the region through irrigation and provision of more dependable water supplies.
2. Provide hydro electric power up to 475,000,000 K.W.H. annually.
3. It will regulate water supply for the communities tributary to the project.
4. Reduce flood hazards on the river by close regulation.
5. Provide many new recreational facilities in the area.

The main benefit which will accrue specifically to the City of Saskatoon, once the project is in full operation, will largely be due to the fact that water in the main irrigation canals will be flowing to the boundaries of the city. This will ensure, for all time, feed for the growing livestock industry in this part of Saskatchewan. It is expected that in the beginning feed products will be principally raised in the areas immediately tributary to the canals. Subsequently, no doubt, as experience develops, vegetables and sugar beets may come to be grown, with the eventual development of a canning industry in this city.

Undoubtedly the agricultural population of the area, which is now down to a minimum, will start to rise, with an equal impact on business in Saskatoon. The recreational amenities which will gradually develop will also have a worthwhile bearing on the life of the city.

The overall construction cost of the project, which is financed jointly by the Government of Canada and the Province of Saskatchewan, will be around $185,000,000. To this must be added the cost of the irrigation system and the land preparation as development proceeds.

DO YOUR EMPLOYERS FURNISH YOU WITH THE LATEST EDITION OF THE CITY DIRECTORY?

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities "too sharp" for bad-check "operators."

Out of Sight — Out of Mind

Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised.

•

THE CITY DIRECTORY IS THE NATURAL MEDIUM FOR KEEPING A BUSINESS OR PRODUCT NAME IN THE SPOTLIGHT

INSIST ON BEING WELL REPRESENTED IN ITS PAGES.

CAUTION . . .

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of the publisher of this City Directory printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take advance payment for either advertising or subscriptions.

When You Want to Know:

—where a person lives.

—what his occupation is.

—who lives at a certain number on a street.

—where a street is located.

—the correct spelling of a name.

—the officers of a corporation.

—the partners in a firm.

—the solution to any of scores of problems that pop up unexpectedly to annoy and baffle you.

–YOU CAN QUICKLY FIND THE ANSWER IN THE CITY DIRECTORY.

CASHIERS! TELLERS! CLERKS!

Do your employers furnish you with the latest edition of the City Directory?

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities "too sharp" for bad-check "operators."

Out of Sight — Out of Mind

—Out of Business—

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised.

THE CITY DIRECTORY IS THE NATURAL MEDIUM FOR KEEPING A BUSINESS OR PRODUCT NAME IN THE SPOTLIGHT.

INSIST ON BEING WELL REPRESENTED IN ITS PAGES.

CAUTION . . .

Pay no money in advance to itinerant Directory canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of the publisher of this City Directory printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take advance payment for either advertising or subscriptions.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

EXPLANATION

Wives names are listed with husbands, the name of the wife is shown in parenthesis following the husband's as follows: Gregory Richd M (Mary L).

In case of a widow by death, wherever possible the name of the deceased husband is shown in parenthesis as follows: Gregory Mary L (wid Richd M).

The occupation and place of employment is listed as follows: Gregory Richd M (Mary L) slsmn Starr Clothing Co.

Names in **heavy type** denote advertisers in this City Directory.

Ownership or co-ownership of a firm is indicated by showing the individual's name in parenthesis following the firm name, as follows: Carson Grocery Co (Geo B and Paul N Carson).

A firm name enclosed by parenthesis indicates ownership or co-ownership by the individual whose name precedes, as follows: Carson Geo B (Carson Grocery Co).

The head of the house is indicated by h preceding the street address; other members of the family and roomers are indicated by r preceding the street address.

...ns of highly trained craftsmen with modern equipment to create appealing products.

For over 25 years Midwest has been a leader in the art of quality printing. From this background of experience we can offer the ultimate in layout and arrangement — modern pleasing type faces — appealing color that will add sparkle to your printing requirements, be it letterpress or offset.

Whether you want a "fire-sale" circular, a distinctive brochure or a dignified letterhead we are able to meet your every need.

In the matter of printing may we offer our creative assistance and conscientious service?

At your service . . .from a one color business card to a four color map — publications — folders — catalogues — office forms — labels — programs.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

SASKATOON

Directory of Householders, Occupants of Office Buildings and Other Business Places, Including a Complete Street and Avenue Guide

1965

Copyright, 1965, by Henderson Directories Ltd., Winnipeg

208 - 3rd AVE. SOUTH
Klomlies
REAL ESTATE LTD.
TEL. 244-1125

In the following list the numbered avenues and streets are arranged in numerical order, followed by the named avenues and streets in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices the occupants are shown by room numbers where practicable, in apartment homes the number denotes the number of the apartment. The profession or business of individuals or firms is given only at their respective places of business to find occupations of others refer to Alphabetical List of Names.

The symbol ◎ following a householder's name indicates that we have received information during the canvass that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown.

The symbol △ preceding the names denotes houses having telephones.

(This section includes some listings reading "No Return." In each case the Publishers tried diligently, by various means, to obtain the information for the occupants but were unsuccessful. First two personal calls were made by an enumerator; next, a post card was mailed and the telephone used when possible).

(The numerals that appear at right edge of columns, ahead of street descriptions and some street intersections, are merely for the guidance of the publishers, and have no other significance.)

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

REAL ESTATE LTD.

THE SEAL OF SERVICE

TEL. 244-1125

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

Out of Sight — Out of Mind — Out of Business

The importance of keeping firm and product names in the public eye is recognized by all business men. It is astonishing to see how a firm or product, however meritorious, will slip into the limbo of the forgotten if not persistently advertised. The City Directory is the natural medium for keeping a business or product name in the spotlight.

Insist on Being Well Represented in Its Pages

MORE GOODS ARE BOUGHT AND SOLD THROUGH THE CLASSIFIED BUSINESS LISTS OF THE DIRECTORY THAN ANY OTHER MEDIUM ON EARTH

Your City Directory has

HUNDREDS OF USES AND APPLICATIONS

BUYING

Learning new sources of supply.
Keeping up with known sources of supply.
Checking on the record of firms from which you buy as to dependability, stability, etc.

SELLING (Including market analysis and sales promotion)

Locating new markets.
Maintaining up-to-date mailing lists.
Analyzing the buying power of a community or street.
Routing salesmen to avoid lost motion in reaching prospects.
Locating residents of hotels and apartment buildings, many of whom are listed nowhere else.
Identifying names and titles of officials, for use of salesmen.

CREDIT REFERENCE (and Collections)

Running down delinquent debtors.
Checking credit applications as to address, moving habits, names of employers, stability of employment, family status, neighbors, whether owner or renter, etc.
Identifying persons of same or similar names.
Investigating cases in welfare, charitable, social service and legal work.

DELIVERY Communication, Mailing, Etc.

Routing deliveries.
Reducing dead letters and insuring more complete delivery of mail.
Effecting delivery of messages and parcels erroneously or defectively addressed.
Correcting names and titles.

LAW ENFORCEMENT Criminal Detection and Apprehension

Tripping bad-check passers.
Deciphering illegible signatures.
Guarding against habitual bill dodgers.
Tracing heirs and witnesses, settling estates, and establishing facts as of a certain date.
